MUSHROOM PRODUCTION STEADY - VALUE DOWN 5 PERCENT

Mushroom production in the United States reached nearly 471 million pounds (213 thousand metric tons) during the 1980-81 marketing season. This is fractionally higher than the 1979-80 crop and 4 percent more than production in 1978-79 and continues the upward trend in production since mushroom estimates were started in 1966. This year's survey includes growers with production in 26 States, unchanged from a year earlier. Pennsylvania, the leading State, with 50 percent of the U.S. 1980-81 crop, grew 237 million pounds, up 11 percent from the previous season. Eastern States accounted for 62 percent of the total U.S. production; Central States, 13 percent; and Western States, 25 percent.

The value of the 1980-81 crop was \$351 million, down 5 percent from the 1979-80 season. Growers averaged 74.5 cents per pound compared with 78.4 cents the previous season. Volume of fresh market sales increased to 267 million pounds during the 1980-81 marketing year, up 4 percent from the 1979-80 season. Fresh sales accounted for 57 percent of the U.S. production continuing the upward trend in the proportion sold fresh. The average price received by growers for mushrooms sold for fresh market averaged 91.8 cents per pound, a decrease of 4 cents from the previous season. Processor usage totaled 203 million pounds, 5 percent less than the prior season. Grower prices received for processing mushrooms averaged 51.8 cents per pound, a decline of nearly 6 cents per pound from 1979-80.

Growers used approximately 140 million square feet (13.0 million square meters) of bed and tray area to produce the 1980-81 crop, down 7 percent from the previous season. Yields averaged 3.35 pounds per square foot, 7 percent more than the 1979-80 yield.

An estimated 142 million square feet (13.2 million square meters) of production area is intended for use during the 1981-82 season, a 1 percent increase from last season. If growers' current plans are carried out, first filling will be virtually the same as last season; second filling, up 1 percent; and additional fillings, up 3 percent from the 1980-81 season.
